

MISKI DEE

Miski Dee is a Los Angeles based musician, songwriter, and performer best known as the founder and creative force behind the punk/alternative rock project City Mouse. With a voice defined by emotional clarity and unflinching honesty, Miski Dee has established herself as a vital presence in contemporary underground punk, creating music that confronts grief, survival, identity, and healing with rare vulnerability.

Emerging from the DIY punk community, Miski founded City Mouse as a deeply personal songwriting outlet that quickly resonated far beyond its origins. Her work transforms personal loss, trauma, and growth into songs that offer both confrontation and comfort. This emotional authenticity has become her signature, earning a devoted international following.

As a performer, Miski Dee is known for her intensely emotive live shows, delivering performances that blur the line between artist and audience. Through relentless touring, she has brought her music to stages across North America, the United Kingdom, and Europe, building lasting connections with listeners drawn to the honesty and emotional power of her work.

Her songwriting reached a new level of depth and maturity with City Mouse's 2024 full-length album *So Far Out*, a record that explores cycles of loss and self-destruction alongside the possibility of hope and renewal. The album reflects Miski Dee's continued evolution as both a writer and a person, capturing the complexity of rebuilding oneself in the aftermath of profound change.

Beyond her recorded output, Miski Dee remains deeply rooted in the independent music community, embodying the DIY ethos through self-releasing music, touring independently, and maintaining direct connection with her audience. Her work stands as a testament to the power of vulnerability in punk, expanding the genre's emotional range while remaining grounded in its spirit of honesty and resistance.

Through every performance and recording, Miski Dee continues to create space for listeners to see themselves reflected in her songs, offering not just music, but recognition, catharsis, and the possibility of something brighter beyond survival.
